REQUEST FOR PROPOSAL
I-405, Brickyard to SR 527 Improvement Project

Mandatory Standards

2.2 Mandatory Standards

Certain Sections of this Request for Proposal (RFP) list mandatory manuals and publications that the Design-Builder shall use for the design and construction described in those Sections. The Design-Builder shall use the current mandatory manuals and publications as of the RFP issue date unless otherwise specified in this Contract.

The Mandatory Standards Section in each RFP Section shall be followed for all design and construction related to that Section. These Mandatory Standards are listed in hierarchical order, where the Mandatory Standards listed higher in the list shall take precedence over those listed below them. If a Mandatory Standard contains a reference to another document that is not listed and states that the referenced document shall be used, the referenced document shall also be considered to be a Mandatory Standard with the same hierarchal precedence as the source publication. These are not comprehensive lists; other applicable standards may be required to complete the design and construction. If the Design-Builder becomes aware of ambiguities or conflicts relating to the Mandatory Standards, the Design-Builder shall immediately notify the WSDOT Engineer.

If there are updates to the mandatory manuals or publications between the RFP issue date and 14 Calendar Days prior to the Proposal Due Date, WSDOT may issue an addendum to the RFP to account for those updates.

Changes resulting from updates to the mandatory manuals and publications that are not included in the Contract will be administered in accordance with Section 1-04 of the *General Provisions*.
